Sinds mei 1989 heeft NTG de TEX-NL fileserver. Voor leden interessante files worden daarbij centraal beschikbaar gesteld.

Men kan files van deze fileserver betrekken door het sturen van een volgende e-mail:

to : listserv@nic.surfnet.nl
subject : 'any'
GET filename1 filetype1
GET filename2 filetype2
GET filename3 filetype3
e tc

Waarbij de mogelijke filenames en filetypes in de hieronder getoonde listing zijn opgenomen.

De lijst van alle aanwezige files is te verkrijgen door het sturen van de volgende e-mail:

to : listserv@nic.surfnet.nl
subject : 'any'
GET TEX-NL FILELIST

Door het versturen van bovenstaande één-regelige boodschap ontvangt men de volgende informatie terug:

* TEX-NL FILELIST for LISTSERV@HEARN.
* TEX-NL Filelist
* Contains
  -- general TeX stuff (implementations for micros, graphical
  shells, printer drivers, etc.)
  -- specifically Dutch stuff (styles and options, hyphenation
  patterns)
  -- Dutch TeX Users Group (NTG) stuff

* Please Note:
  To prevent having to send large files across the networks,
  the uuencoded zoo archives will be split if they are larger
  than 1024 records. In these cases the command
  GET <name> PACKAGE will send all the parts to the requestor.

* *******************************************************************
* This file lists the programs that are stored on LISTSERV and can be
* retrieved by network users.
* If an entry shows nrecs=0 the file is not available.
* This filelist may be sorted in columns 47 to 63 to get a list of
* files in the order of their updates. Sorting in descending order
* shows the most recently updated files at the top.
